Harbour Cove is selling 89 octane non ethanol.

- **Prevents Corrosion:**
- Ethanol attracts and absorbs water, leading to phase separation and causing corrosion in fuel systems, especially in marine engines that often sit for extended periods.
- **Better Storage Stability:**
- Ethanol-free fuel is more stable for longer storage, making it ideal for seasonal boat usage.
- **Higher Energy Density:**
- Non-ethanol fuel provides more energy per gallon, potentially offering better engine performance.
- **Engine Compatibility:**
- Many older marine engines and components made with rubber or plastic are not designed to handle ethanol, leading to damage and reduced engine life.
